# ABOUT US

## Akwaba Machines

- We manufacture complete machine for cashew processing factory with capacity from 1 metric ton to 100 metric ton per day with high productivity , low broken rate , low maintenance and labour.
- Nous fabriquons une machine complète pour usine de transformation de noix de cajou avec une capacité de 1 tonne à 100 tonnes par jour avec une productivité élevée, un faible taux de casse, peu d'entretien et de main d'œuvre.
- We manufacture , supply complete solutions , turnkey and machinery for cashew processing factory with capacity from 1 metric ton to 100 ton per day with high productivity , low broken rate , low maintenance and labour.
- Nous fabriquons et fournissons des solutions complètes, clés en main et des machines pour les usines de transformation de noix de cajou d'une capacité de 1 tonne à 100 tonnes par jour avec une productivité élevée, un faible taux de casse, peu d'entretien et de main d'œuvre.

### Our Management Team

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

## Why US?

### Reputable

We've more than 400+ satisfied & happy clients across india

### Experts

With wide range of knowledge, We manufactured advance & automatic product.

### High Quality

Quality is our prior concern so we delivered what we promise.

### Flexible Design

We design & deliver as per your requirement

### Punctual

Punctuality is a sign of professionalism.

We know the value of your time so we deliver within your time.

### Quick Installation

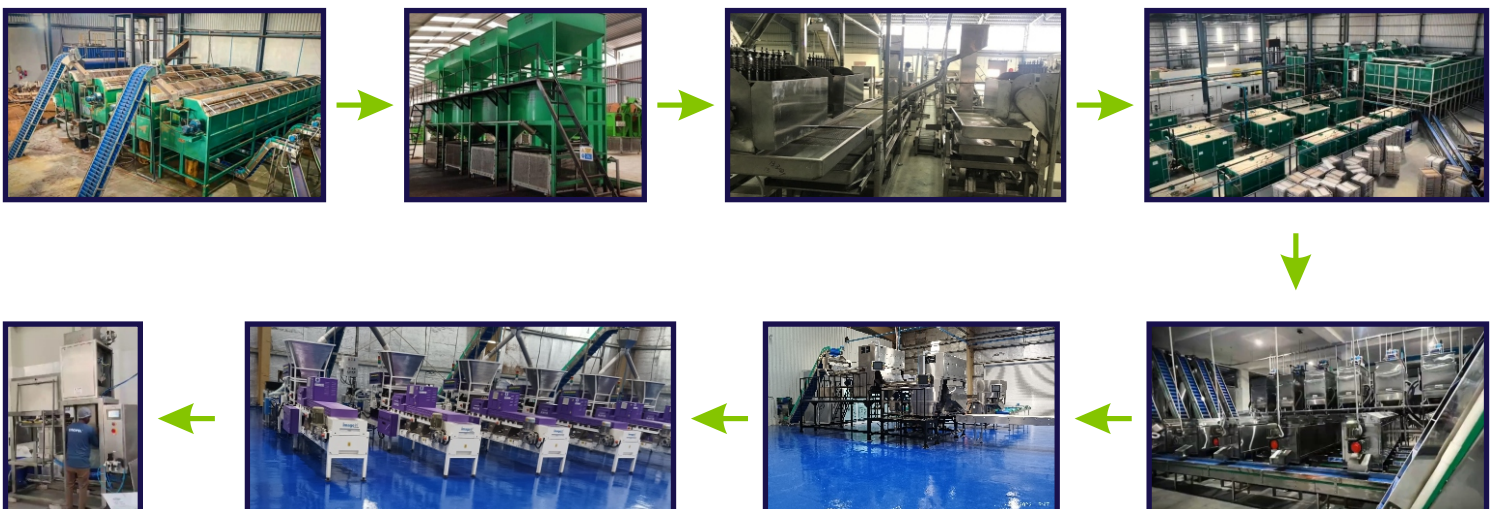

We provide Installation support in less than 3 days.

### Instant Support

We provide instant support through online/ video call.

## Cashew Processing Flow chart

# Cashew nut sorting machine / Trieuse de noix de cajou

**Name** : Cashew nut sorting machine

**Model** : AMRCS

**Grading** : A/B/C/D/E Grade

**Material** : MS

**Purpose** : It is used to separate raw cashew nut according to size (nut counts).  
The main objective is to improve the cutting efficiency.

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Steam cooking / cuisson a la vapeur

**Name** : Steam cooking

**Model** : AMSCM/500/1000/2000

**Material** : MS 10 mm With Hydro & DP test

**Purpose** : Raw cashew is cooked inside the cooker with help of high pressure steam generated by boiler.

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Cashew nut shell removal & separation / decorticage et separation de noix de cajou

**Name** : Cashew nut shell removal & separation

**Model** : AMCSSM

**Material** : SS304/MS

**Purpose** : to remove upper shell and kernel automatically with dual vibrator mechanism

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Drying – humidifier / sechoir – hummidificateur

**Name** : Drying & humidifier machine

**Model** : AMDHM/500/1000/2000

**Material** : Mild steel, Aluminium

**Purpose** : to dry cashew kernel after scooping process as well. as after peeling process.

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Peeling machine / depelliculage ou epluchure

- Name** : Cashew peeling machine  
**Model** : AMCPM/200/400/500/kg-hr  
**Material** : Stainless steel 304  
**Purpose** : It remove husk (upper skin) of cashew by pressueised air and it also Segregate BB, Butts, SWP, LWP, Split, Whole kernel.

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Colour sorter / trilleur de couleur

**Name** : Color sortex

**Model** : AMKG 250/500 kg-hr

**Purpose** : to sort finished cashew according to colour & also use to segregate Peeled and unpeeled cashew automatically.

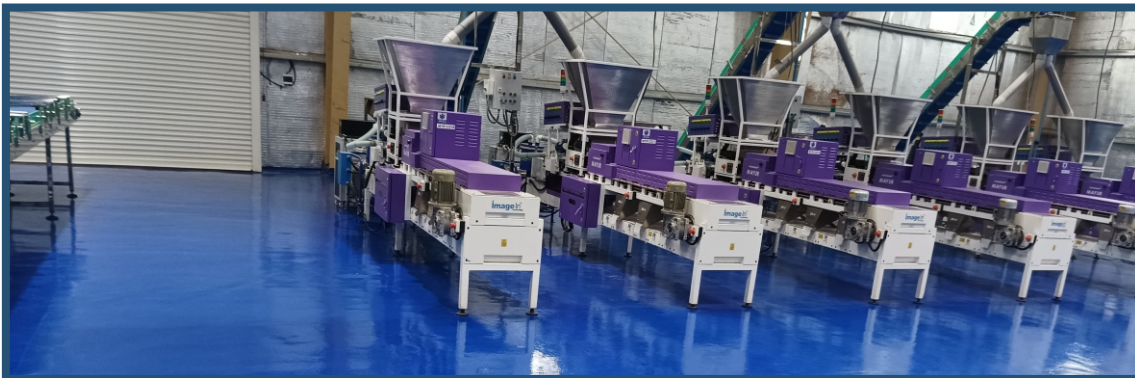

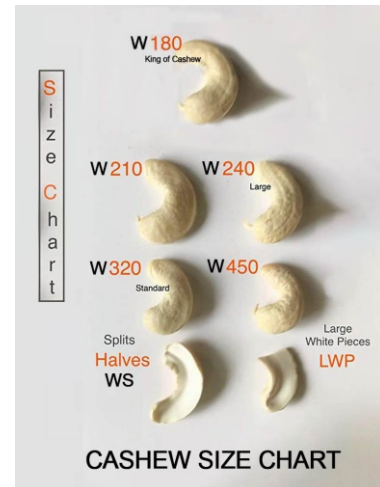

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Kernal grading / classification entire

- Name** : Kernal grading machine  
**Model** : 50 kg to 250 kg per hour  
**Purpose** : to grade whole cashew according to shape and size.  
**I.E.** : WW180/210, WW240, Ww320, WW400/450

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR

# Packing / Emballage

**Name** : Packing machine

**Model** : AMPM

**Material** : MS, Stainless steel 304

**Purpose** : It is used to do pouch Packing of finished Cashew according to weight and Size. i.e 25 LBS to 50 LBS

HIGH PRODUCTIVITY • LOW BROKEN RATE • LOW MAINTENANCE AND LABOUR
